

Pressed Juicery — Static Clone Audit · AFTER (fixes applied)

https://pressed.com vs http://localhost:3081 · 7 pages · desktop 1440px · auto-descend anchored per-section pixel diff

Each page below shows the full-page live vs clone side by side, the concrete discrepancies to fix, a per-section diff table, and live/clone diff crops of the worst sections. Diff % is a triage signal (photo antialiasing inflates it on image-heavy sections); the written discrepancies + crops are the actionable part.

DISCREPANCIES TO FIX

1. **[high] Brand logo (header + footer)** — The 'pressed JUICERY' wordmark is absent from the header and the circular leaf mark is absent from the footer; both render on live.
fix: Capture replaced them with a transparent 1x1 GIF — restore the real inline SVG via the icon registry.
2. **[high] Global typography** — All headings/bold text render in Helvetica/Arial rather than the brand sans, visibly heavier and wider.
fix: Markup requests regola-neue-semibold/-medium/-regular but no @font-face declared them; self-host the real faces under those exact names.
3. **[high] Footer legal bar** — The black footer background stops mid-way through the copyright line, slicing it in half; the second legal line is not visible.
fix: Set the legal bar to height:auto with padding and remove the fixed height/overflow:hidden on the black footer container.
4. **[high] Footer social icons** — Instagram, Facebook, X/Twitter and YouTube icons at the right of the legal bar are missing entirely.
fix: Restore the four social icon sources (blank 1x1 GIF placeholders) via the icon registry.
5. **[high] Header cart icon** — The far-right shopping-bag icon is missing; only the account icon renders.
fix: Restore the 'Go to cart' icon source from the registry.
6. **[med] Hero media + play/pause control** — The hero is a static poster image where live plays a looping video, and the pause control is an empty white circle.
fix: Replace the empty <mux-player> custom element with a real <video autoplay muted loop playsinline poster=...> and restore the pause glyph.
7. **[med] Pressed Rewards CTA button** — The pill button label reads 'Join For' instead of 'Join For Free' — the word 'Free' is clipped.
fix: Remove the fixed width on the pill; use padding with white-space:nowrap.
8. **[med] Announcement bar carousel controls** — The prev/next/pause controls at the right edge of the promo bar are missing.
fix: Restore the three control icon sources from the registry.
9. **[med] Product row card alignment** — In the second product row, the card whose title wraps to three lines drops its price and CTA ~25px below its neighbours, breaking the shared baseline.
fix: Make each card display:flex; flex-direction:column; height:100% and push the price/CTA group down with margin-top:auto.
10. **[med] Footer link columns** — Footer columns are ~70-90px narrower than live, wrapping 'Find a Store', 'Juice Cleanses', 'Member Terms and Conditions' and 'VIP Terms and Conditions' onto two lines.
fix: Widen the footer grid to the full container width and let the link columns size to content.
11. **[low] Section photography crop** — Photos are scaled ~8-10% larger inside identically-sized frames, cropping subjects tighter than live.
fix: Match live's object-fit/aspect-ratio on the image frames instead of the upscaled background-size.
12. **[low] 'Learn More' button** — Renders as a ~8px rounded rectangle where live uses a fully-rounded pill.
fix: Set border-radius: 9999px to match the other CTAs.

LIVE (PRESSED.COM)

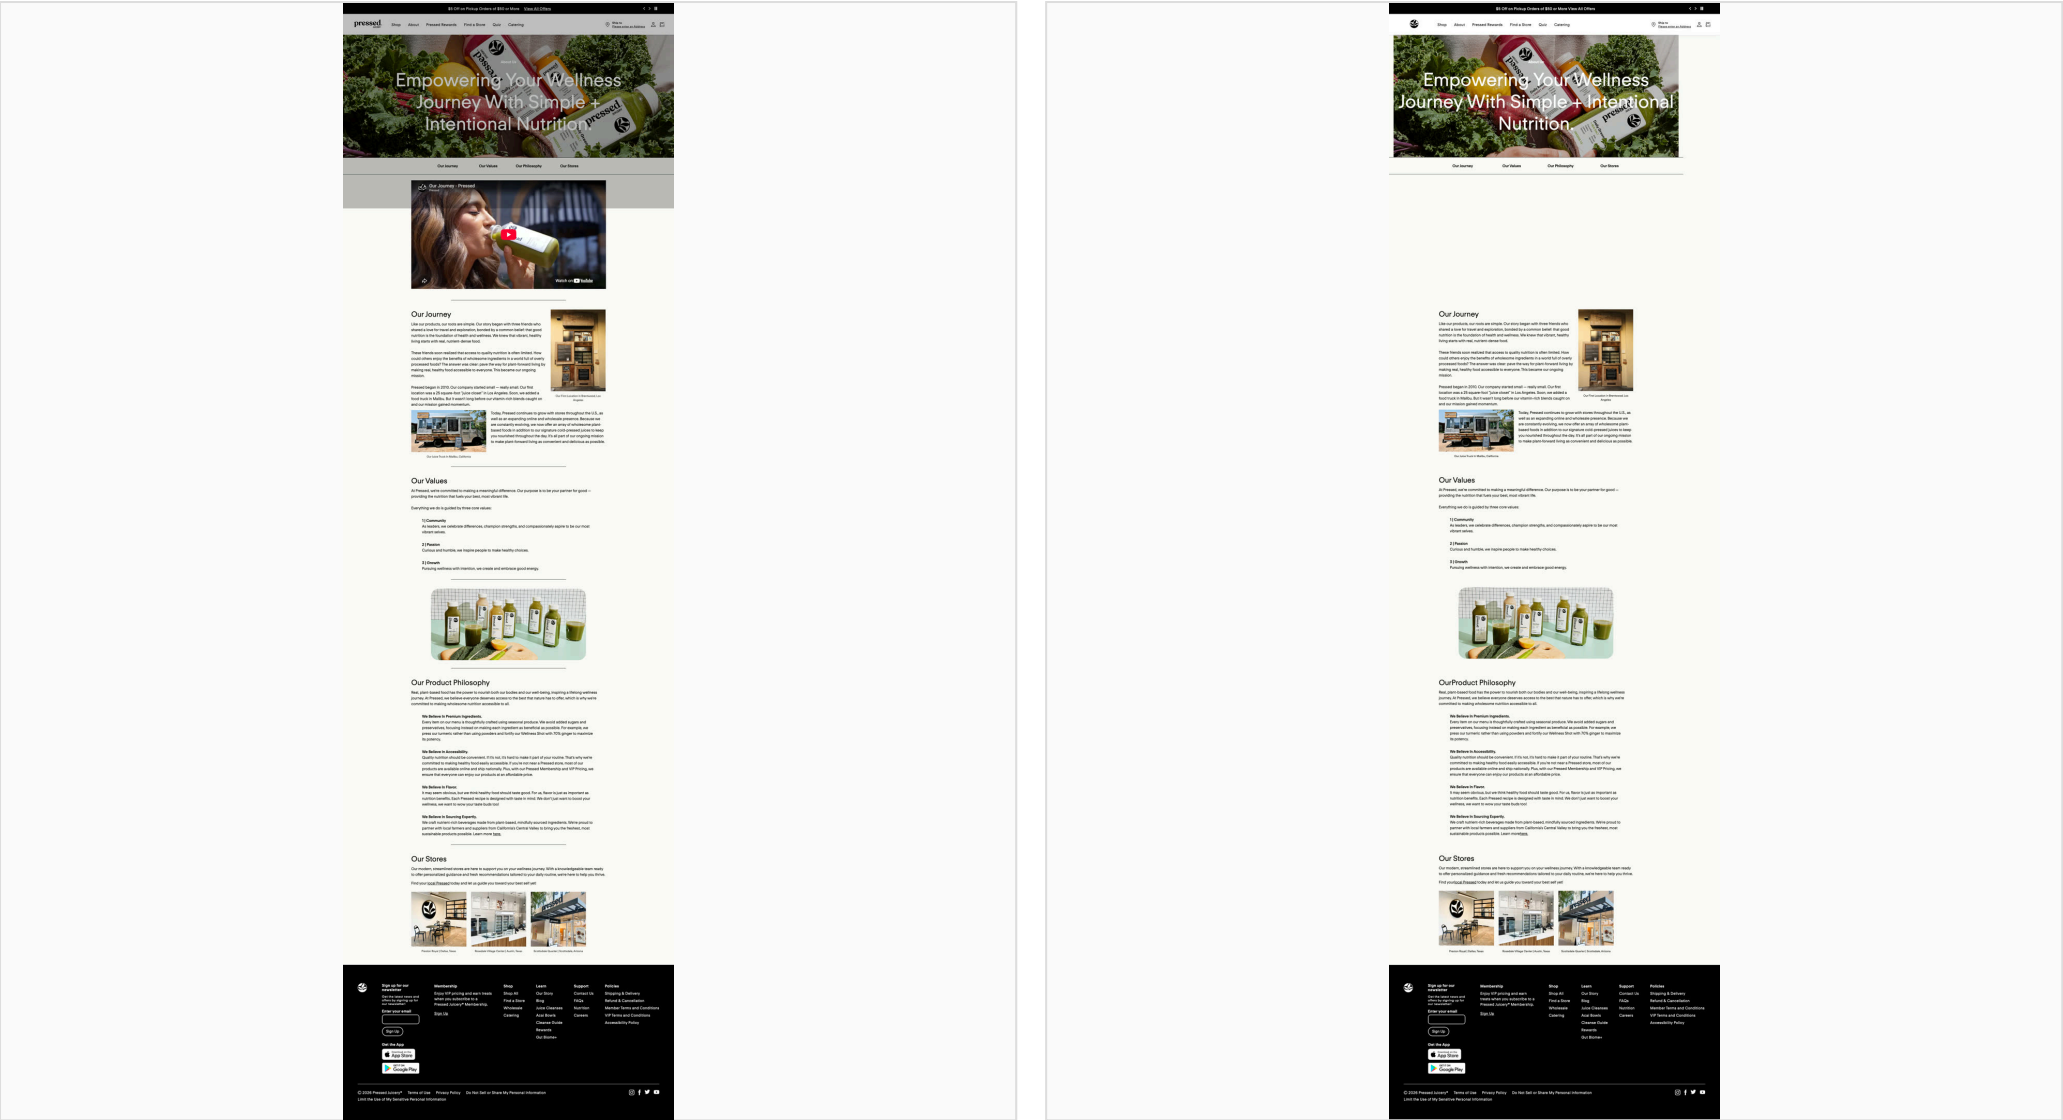

CLONE (STATIC BUILD)

DISCREPANCIES TO FIX

- [high] Footer** — The clone has no footer at all on /shop — the page ends after the last product card with ~1450px of blank white, while live renders the full dark footer.
fix: Ensure the footer partial renders on the shop route and remove the trailing whitespace.
- [high] Product grid columns** — The grid uses auto-fit so short sections stretch: Gift Cards (1 item) renders as a single ~1270px-wide tile, Supplements (2) as two ~600px tiles, versus a fixed 6-column ~166px card on live. Main cause of ~3300px extra page height.
fix: Use grid-template-columns: repeat(6, minmax(0,1fr)) with justify-items:start and pin the tile aspect-ratio.
- [high] Header logo** — Empty gap at header top-left where live shows the wordmark.
fix: Restore via the icon registry.
- [high] Filter sidebar — missing groups** — The sidebar shows only a 14-item Product Type list; the 'Gift Cards' row and the entire second 'Function' filter group are missing.
fix: Render the full 26-chip taxonomy across both Product Type and Function groups.
- [med] Filter checkboxes** — Each filter row shows a ~4x18px solid dark bar where live shows a 20x20px outlined checkbox.
fix: Restore the checkbox box model: appearance:none; width/height 20px; border:1.5px solid; flex:0 0 20px.
- [med] Header cart icon** — The shopping-bag icon right of the account icon is missing.
fix: Restore via the icon registry.
- [med] Product card vertical alignment** — Within a row, price and quantity-stepper rows stagger by 20-40px depending on title wrap, where live aligns every row.
fix: Card as flex column with min-height on the title block and margin-top:auto on the price/stepper group.
- [med] Filter sidebar width** — The sidebar is ~162px wide vs ~224px on live, wrapping the heading and long labels; the grid starts at x=267 instead of x=328.
fix: Set the sidebar track to 224px with a ~72px column gap.
- [med] Product title typography** — Product-card titles render bold where live is regular/medium at the same size.
fix: Set the card title to the regular weight.
- [med] Gift card product card** — The 'Gift of Wellness' card shows only the title — the price block and 'Shop now' pill that live renders are absent.
fix: Ensure the price + CTA block renders for gift-card products.
- [low] Acai & Smoothie Bowls spacing** — ~560px of empty white before the next heading where live has a ~90px section gap.
fix: Remove the empty extra grid row / fixed min-height on that section wrapper.

LIVE (PRESSED.COM)

CLONE (STATIC BUILD)

DISCREPANCIES TO FIX

- [high] Our Journey video embed** — The 476px-tall video embed renders as a completely blank off-white block — no poster, no play button, no iframe chrome.
fix: Restore the embed in its 16:9 wrapper, or a static poster plus play-button overlay if third-party frames are stripped.
- [high] Main content container width** — The page wrapper is capped at 1280px and left-aligned: the anchor-nav and hero run to x=1279 where live is full-bleed to 1439, leaving a 160px empty right strip.
fix: Remove the max-width on the page wrapper; make hero and anchor-nav full-bleed and centre the inner text container.
- [high] Header brand logo** — The wordmark occupying x=49-169 on live is entirely absent; the header starts at the 'Shop' link.
fix: Restore via the icon registry.
- [med] Hero H1 line wrapping** — Live breaks the h1 into three lines at ~980px; the clone stretches it to the full 1240px hero and breaks differently.
fix: Add max-width:980px; margin-inline:auto to the hero h1.
- [med] Footer social icons** — The four social icons at the right of the legal bar are missing.
fix: Restore via the icon registry.
- [med] Footer brand mark** — The circular leaf logo at the footer top-left is absent, leaving that grid cell empty.
fix: Restore via the icon registry.
- [med] Header cart/bag icon** — Live shows account and bag icons; the clone drops the bag.
fix: Restore via the icon registry.
- [med] Footer column layout** — Footer columns end at x=1217 instead of 1376, wrapping four link labels onto two lines.
fix: Widen the footer grid to the full container.
- [med] Anchor sub-nav spacing** — The four anchor links span 722px versus 610px on live — ~18% wider gaps.
fix: Use flex with justify-content:center and a fixed gap instead of an evenly-distributed grid.
- [low] Our Values photo aspect** — The photo is 7px taller than live at the same width.
fix: Pin the aspect-ratio with object-fit:cover.

Our Product Philosophy

Real, plant-based food has the power to nourish both our bodies and our well-being, inspiring a lifelong wellness journey. At PRESSED, we believe everyone deserves access to the best that nature has to offer, which is why we're committed to making wholesome nutrition accessible to all.

We Believe in Premium Ingredients.

Every item on our menu is thoughtfully crafted using seasonal produce. We avoid added sugars and preservatives, focusing instead on making each ingredient as beneficial as possible. For example, we press our turmeric rather than using powders and fortify our Wellness Shot with 70% ginger to maximize its potency.

We Believe in Accessibility.

Quality nutrition should be convenient. If it's not, it's hard to make it part of your routine. That's why we're committed to making healthy food easily accessible. If you're not near a PRESSED store, most of our products are available online and ship nationally. Plus, with our PRESSED Membership and VIP Pricing, we ensure that everyone can enjoy our products at an affordable price.

We Believe in Flavor.

It may seem obvious, but we think healthy food should taste good. For us, flavor is just as important as nutrition benefits. Each PRESSED recipe is designed with taste in mind. We don't just want to boost your wellness, we want to wow your taste buds too!

We Believe in Sourcing Expertly.

We craft nutrient-rich beverages made from plant-based, mindfully sourced ingredients. We're proud to partner with local farmers and suppliers from California's Central Valley to bring you the freshest, most sustainable products possible. [Learn more here.](#)

LIVE (PRESSED.COM)

CLONE (STATIC BUILD)

DISCREPANCIES TO FIX

- [high] Header logo** — The header top-left is empty where live shows the wordmark.
fix: Restore via the icon registry.
- [high] Bold font weight (site-wide)** — Every bold string renders at regular weight — headings, the Filters label and all footer column headings — while letterforms otherwise match.
fix: The 600/700 brand faces were never declared; self-host regola-neue-semibold/-medium under the requested family names.
- [high] Locator section / map height** — The map is 597px tall versus 693px on live (100vh minus header), the entire 100px page shortfall, clipping the store link row out of view.
fix: Replace the fixed map height with calc(100vh - header) on the two-column wrapper.
- [high] Page container max-width** — The locator grid is capped at 1152px leaving a 225px empty right gutter; live is full-bleed with 64px padding.
fix: Remove the max-width cap on the locator section wrapper.
- [med] Header cart/bag icon** — Only the account icon renders; the bag icon is missing.
fix: Restore via the icon registry.
- [med] Footer brand mark** — The circular leaf logo is missing from the footer top-left.
fix: Restore via the icon registry.
- [med] Footer social icons** — The four social icons are absent from the bottom bar.
fix: Restore via the icon registry.
- [med] Footer link grid widths** — Columns are compressed, forcing wraps that live does not have.
fix: Drop the 1152px cap on the footer nav grid.
- [med] Google Map chrome** — Zoom controls are empty white boxes with no +/- glyphs and the Google watermark is absent (map tiles are unpainted in BOTH captures, so the blank canvas itself is not clone-specific).
fix: Third-party Google Maps chrome; documented as a known static-clone gap.
- [low] Map container corners** — The map panel has a ~12px border-radius; live is square-cornered.
fix: Set border-radius:0 on the map wrapper.
- [low] Promo banner carousel controls** — The prev/next/pause controls at the far right of the promo bar are missing.
fix: Restore via the icon registry.
- [low] Live capture backdrop (audit artifact)** — The live screenshot's viewport is uniformly darkened to 75% brightness because a modal scrim was open during capture, so global colour deltas on this page are false positives.
fix: No clone change; re-capture live with the modal dismissed before trusting colour diffs here.

Flavor Quiz

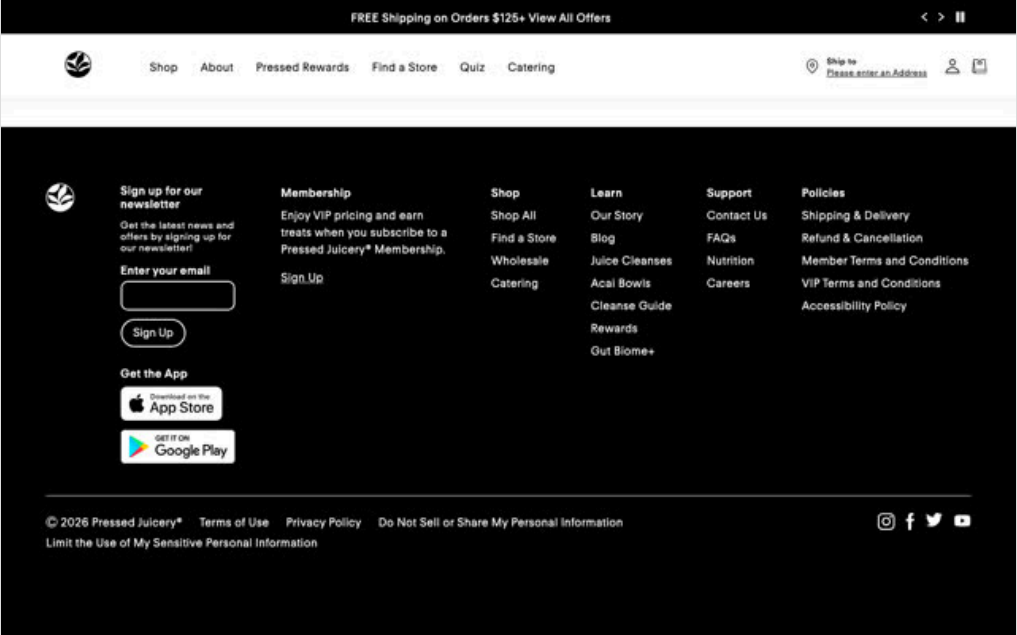

worst section 100.0%

https://pressed.com/flavor-quiz vs http://localhost:3081/flavor-quiz

⚠ live capture came back blank — treat this page's diff as unreliable

LIVE (PRESSED.COM)

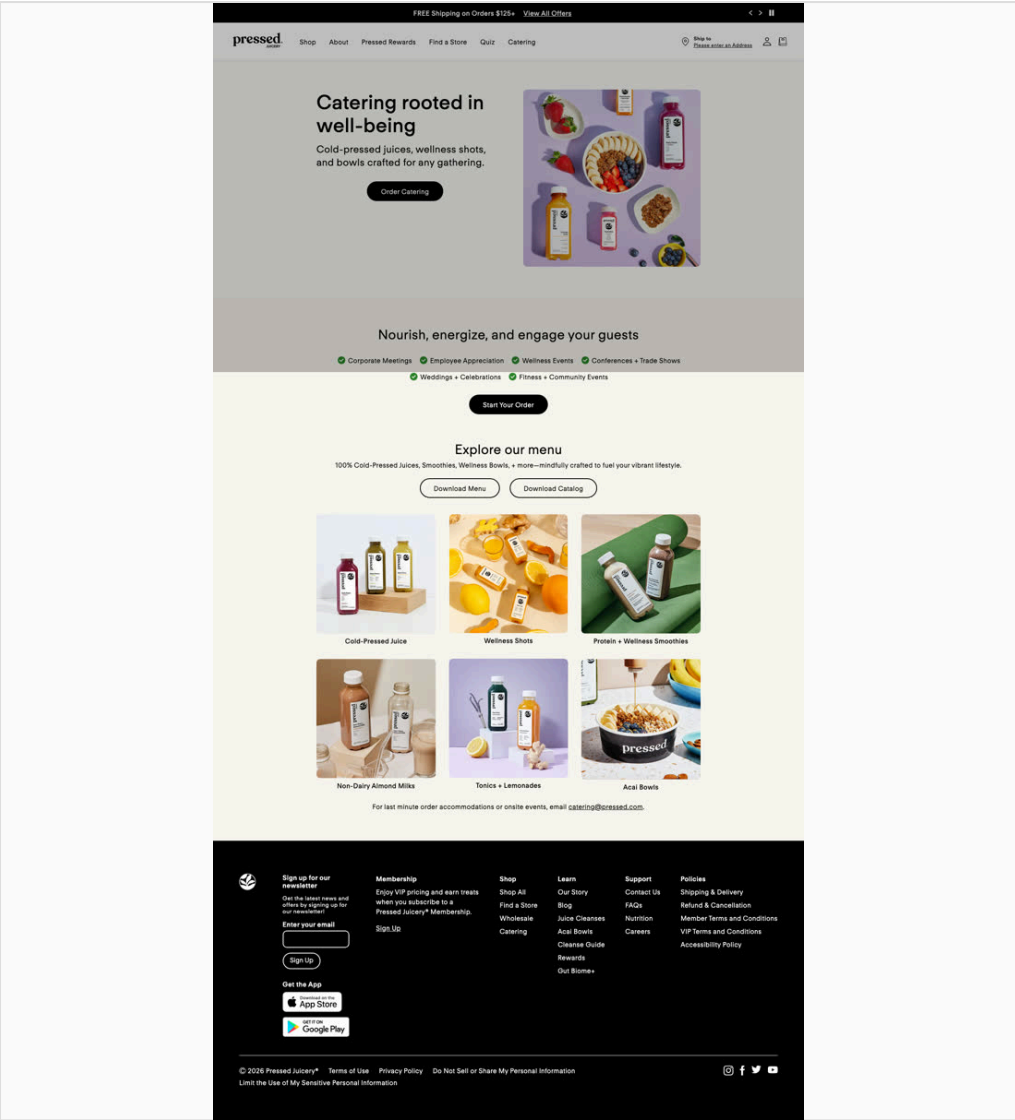

CLONE (STATIC BUILD)

DISCREPANCIES TO FIX

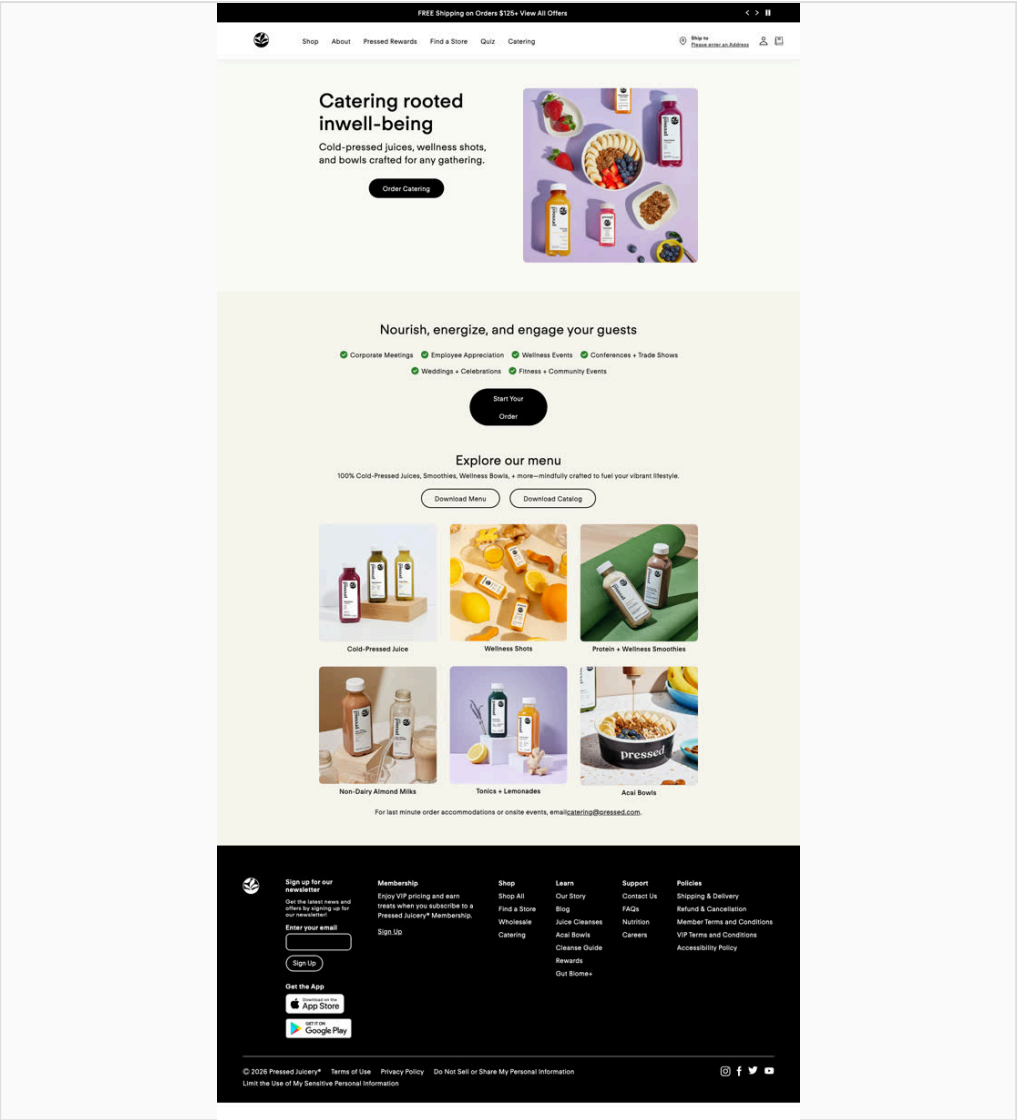

- 1. **[high] Quiz body (lightbox iframe)** — The entire quiz UI is absent — the lightbox iframe has no src, rendering an empty region between header and footer where live loads the embedded quiz form.
fix: Third-party lightbox embed; supply the embed URL or a static stand-in, and document as a known gap.
- 2. **[high] Header wordmark logo** — The wordmark is the transparent 1x1 GIF placeholder and the sibling <source> has no srcSet.
fix: Restore via the icon registry.
- 3. **[high] Page background / modal scrim** — Live renders the whole page at #BFBFBF because the quiz modal's 25% black scrim is open; the clone is pure white.
fix: Audit artifact plus the missing modal — colour deltas on this page are not independent defects.
- 4. **[high] Header cart/bag icon** — The shopping-bag icon is the 1x1 GIF placeholder.
fix: Restore via the icon registry.
- 5. **[med] Footer leaf mark** — The circular footer logo is the 1x1 GIF placeholder, leaving a blank 40px square.
fix: Restore via the icon registry.
- 6. **[med] Footer social icons** — All four social icons are invisible because the shared logo component hard-codes the 1x1 GIF for every item.
fix: Change the component to resolve its src from the icon registry by aria-label.
- 7. **[med] Footer link-column grid** — Columns are ~70px narrower than live, forcing four labels onto two lines and the Membership paragraph to four lines.
fix: Replace the captured fixed pixel grid columns with minmax(0,1fr) and fixed px gaps.
- 8. **[med] Semibold headings (font fallback)** — Every semibold heading renders at regular weight; markup asks for regola-neue-semibold which had no @font-face and fell back to sans-serif.
fix: Declare the missing faces under the requested family names.
- 9. **[low] Promo bar carousel controls** — The prev/next/pause controls render the 1x1 GIF.
fix: Restore via the icon registry.
- 10. **[low] Registered-trademark glyph** — The registered mark renders at full body size rather than as a raised superscript.
fix: Restore the superscript styling on that glyph.

LIVE (PRESSED.COM)

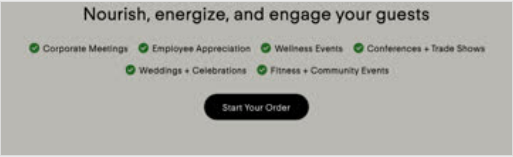

CLONE (STATIC BUILD)

DISCREPANCIES TO FIX

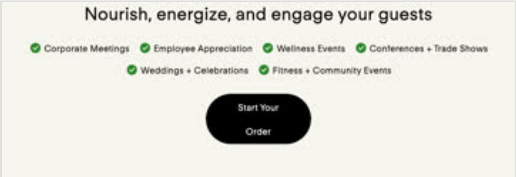

1. **[high] Header logo** — The wordmark is completely absent from the header; the left slot renders empty white.
fix: Restore via the icon registry.
2. **[high] Footer social icons** — The four social icons on the right of the legal bar are entirely missing.
fix: Restore via the icon registry.
3. **[high] Start Your Order CTA** — The pill button label wraps onto two lines, inflating the button into a ~110px tall blob and pushing the page 44px taller.
fix: Add white-space:nowrap and explicit horizontal padding with width:auto.
4. **[high] Footer link columns** — Columns are too narrow and shifted ~75px left, wrapping four labels onto two lines while ~200px of dead space sits at the right edge.
fix: Match live's grid across the full content width.
5. **[med] Footer brand mark** — The circular leaf logo at the footer top-left is missing entirely.
fix: Restore via the icon registry.
6. **[med] Header cart icon** — Only the account icon renders; the bag icon is missing.
fix: Restore via the icon registry.
7. **[med] Menu card captions** — All six 'Explore our menu' captions render bold versus regular/medium on live.
fix: Set the caption weight to regular.
8. **[med] Footer column headings** — Footer headings render regular weight but are bold on live.
fix: Apply the semibold face to the footer column headings.
9. **[med] Hero H1** — The headline is heavier and ~4% wider than live.
fix: Match live's weight and tracking.
10. **[low] Promo bar carousel controls** — The prev/next/pause controls at the right of the promo bar are absent.
fix: Restore via the icon registry.
11. **[low] Hero subhead** — The subhead is ~7px narrower and slightly lighter than live at the same size.
fix: Match live's body size and letter-spacing.

LIVE (PRESSED.COM)

CLONE (STATIC BUILD)

DISCREPANCIES TO FIX

1. **[high] Tier card benefit lists** — Every benefit bullet is missing its filled check-circle icon; the clone renders indented plain text where live shows a black check badge.
fix: Restore the check icon per list item with flex alignment.
2. **[high] Pricing tier cards — alignment** — The three cards are neither top-aligned nor equal-height: card 1's border starts 39px below its siblings and the 'Most Popular' banner is separated from card 2 by a ~19px white gap.
fix: Use grid with align-items:stretch, attach the ribbon to the card, and give the price header a common min-height.
3. **[high] Typography / brand webfont** — The clone falls back to Helvetica/Arial and loses heading weight across the page.
fix: Self-host the brand faces under the requested family names.
4. **[high] VIP Pricing CTA buttons** — 'Sign Up For Yearly' and 'Sign Up For Monthly' are stacked vertically and stretched full width versus two auto-width pills side by side on live.
fix: Wrap in a flex row with width:auto buttons.
5. **[med] 'Earn and Redeem Points' heading** — The heading wraps to four lines instead of two, pushing the section 58px taller than live.
fix: Widen the text column and restore the heading weight and CTA margin.
6. **[med] Points reward cards** — Cards are 146x249px versus live's 113x196px, leaving ~90px of empty space below each label.
fix: Constrain the card track width and min-height.
7. **[med] VIP Pricing product grid width** — The tile grid stops at x=1250 versus x=1418 on live, leaving a ~168px empty right gutter.
fix: Remove the max-width on the tile wrapper so tiles reach the container edge.
8. **[med] Header cart/bag icon** — The bag icon is absent; only the person icon renders.
fix: Restore via the icon registry.
9. **[med] Footer social icons** — The four social icons on the right of the copyright bar are missing.
fix: Restore via the icon registry.
10. **[med] Footer link columns** — Columns are narrower and clustered left, wrapping four labels onto two lines.
fix: Widen the footer grid to the full container.
11. **[med] Promo banner carousel controls** — The prev/next/pause control cluster is absent from the promo bar.
fix: Restore via the icon registry.
12. **[low] Compact tier card row** — Card 1 floats 22px higher than its siblings and ends 11px short.
fix: Apply the same stretch/ribbon-spacer fix as the main tier row.
