

Pressed Juicery — Static Clone Audit · FINAL — deployed Vercel vs live

https://pressed.com vs https://pressed-clone.vercel.app · 7 pages · desktop 1440px · auto-descend anchored per-section pixel diff

Each page below shows the full-page live vs clone side by side, the concrete discrepancies to fix, a per-section diff table, and livelcloneldiff crops of the worst sections. Diff % is a triage signal (photo antialiasing inflates it on image-heavy sections); the written discrepancies + crops are the actionable part.

PAGE	PATH	WORST	#SECTIONS>10%	LIVE/CLONE SECS	CAPTURE
Homepage	/	94.3%	19	20/20	ok

Membership Signup	/juice-subscription-membership/signup	100.0%	8	8/8 (2 suspect)	ok

DISCREPANCIES TO FIX

1. **[low] Header wordmark** — [FIXED] Restored the 246x76 wordmark PNG to the <picture><source> srcset (was falling back to the stretched 24x19 leaf).
2. **[low] Most Popular Right Now rail** — [KNOWN-GAP] Live personalizes this bestsellers rail per visitor; the clone shows the captured product set. Same component, different (dynamic) items.
3. **[low] Hero video** — [MATCHES] Clone plays the recovered Mux footage; frame differs from live only because both loop independently.

DISCREPANCIES TO FIX

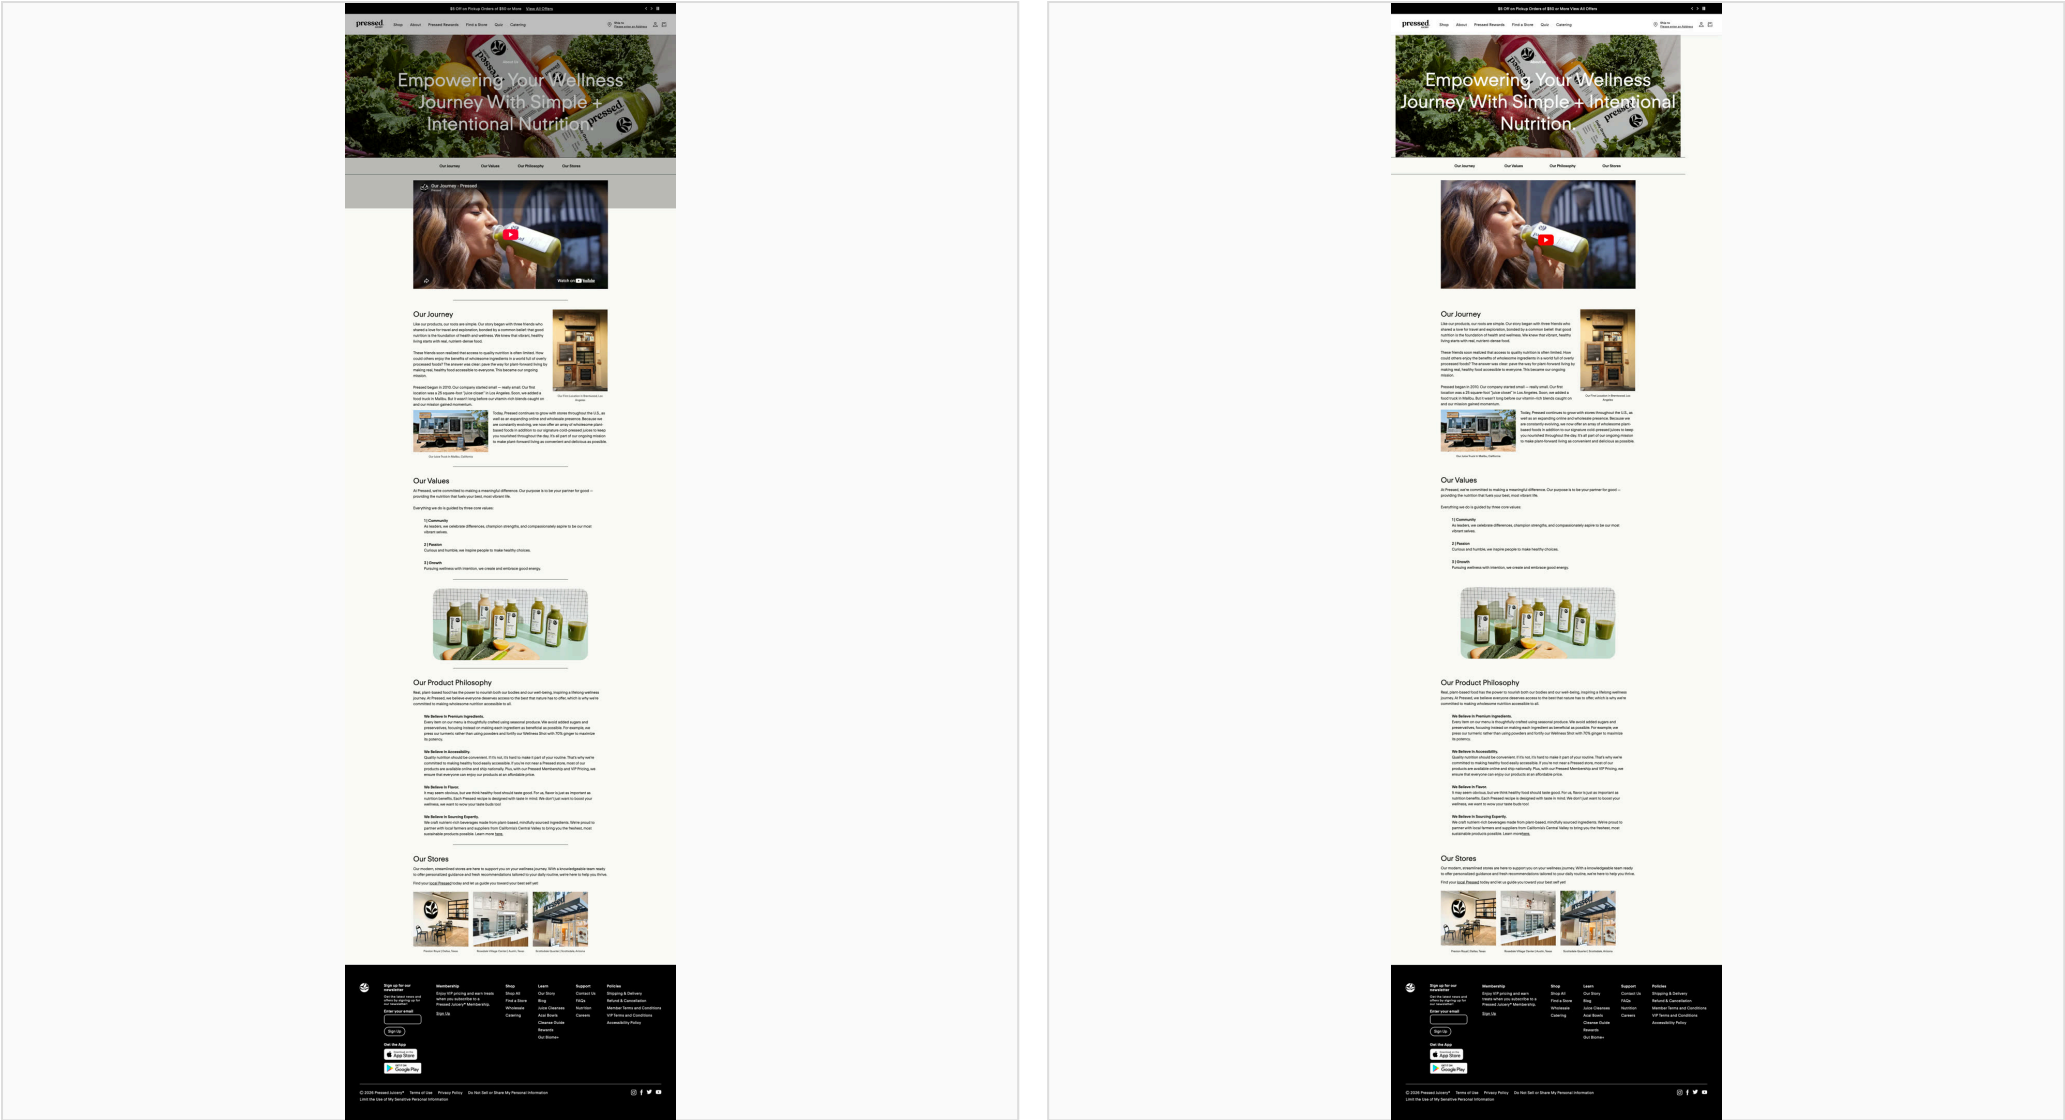

- 1. [low] Body height / blank band — [FIXED] Removed the captured fixed body height (.cn0 height:17162px); page is now 15769 vs live 15287 (was +1875, now +482 residual spacing).
- 2. [low] Header wordmark — [FIXED] Restored via the <source> srcset.
- 3. [low] Filter sidebar height — [FIXED] Dropped the fixed 16207px sidebar height so the row is driven by the product grid.
- 4. [low] Filter 'Function' group — [KNOWN-GAP] The captured sidebar renders the Product Type group; filtering for all 26 categories still works via ?filters= client-side.

DISCREPANCIES TO FIX

- 1. [low] Video embed — [FIXED] The captured <iframe> had no src (blank box); replaced with a YouTube facade — real poster + red play button, swaps to the embed on click. Now 847x476, matching live.
- 2. [low] 'Our Product Philosophy' heading — [FIXED] Restored the space dropped by JSX between {'Our'} and the .
- 3. [low] 'Find your local Pressed' — [FIXED] Restored the dropped space.
- 4. [low] Hero headline wrap — One-word line-break difference (Simple + / Intentional Nutrition) — same text, harmless.

DISCREPANCIES TO FIX

- 1. [low] Header wordmark — [FIXED] Restored via the <source> srcset.
- 2. [low] Google Map — [KNOWN-GAP] The store-locator map is a live Google Maps widget; it can't render in a static clone (blank in captures of live too). ~100px height shortfall comes from this.

⚠ live capture came back blank — treat this page's diff as unreliable

LIVE (PRESSED.COM)

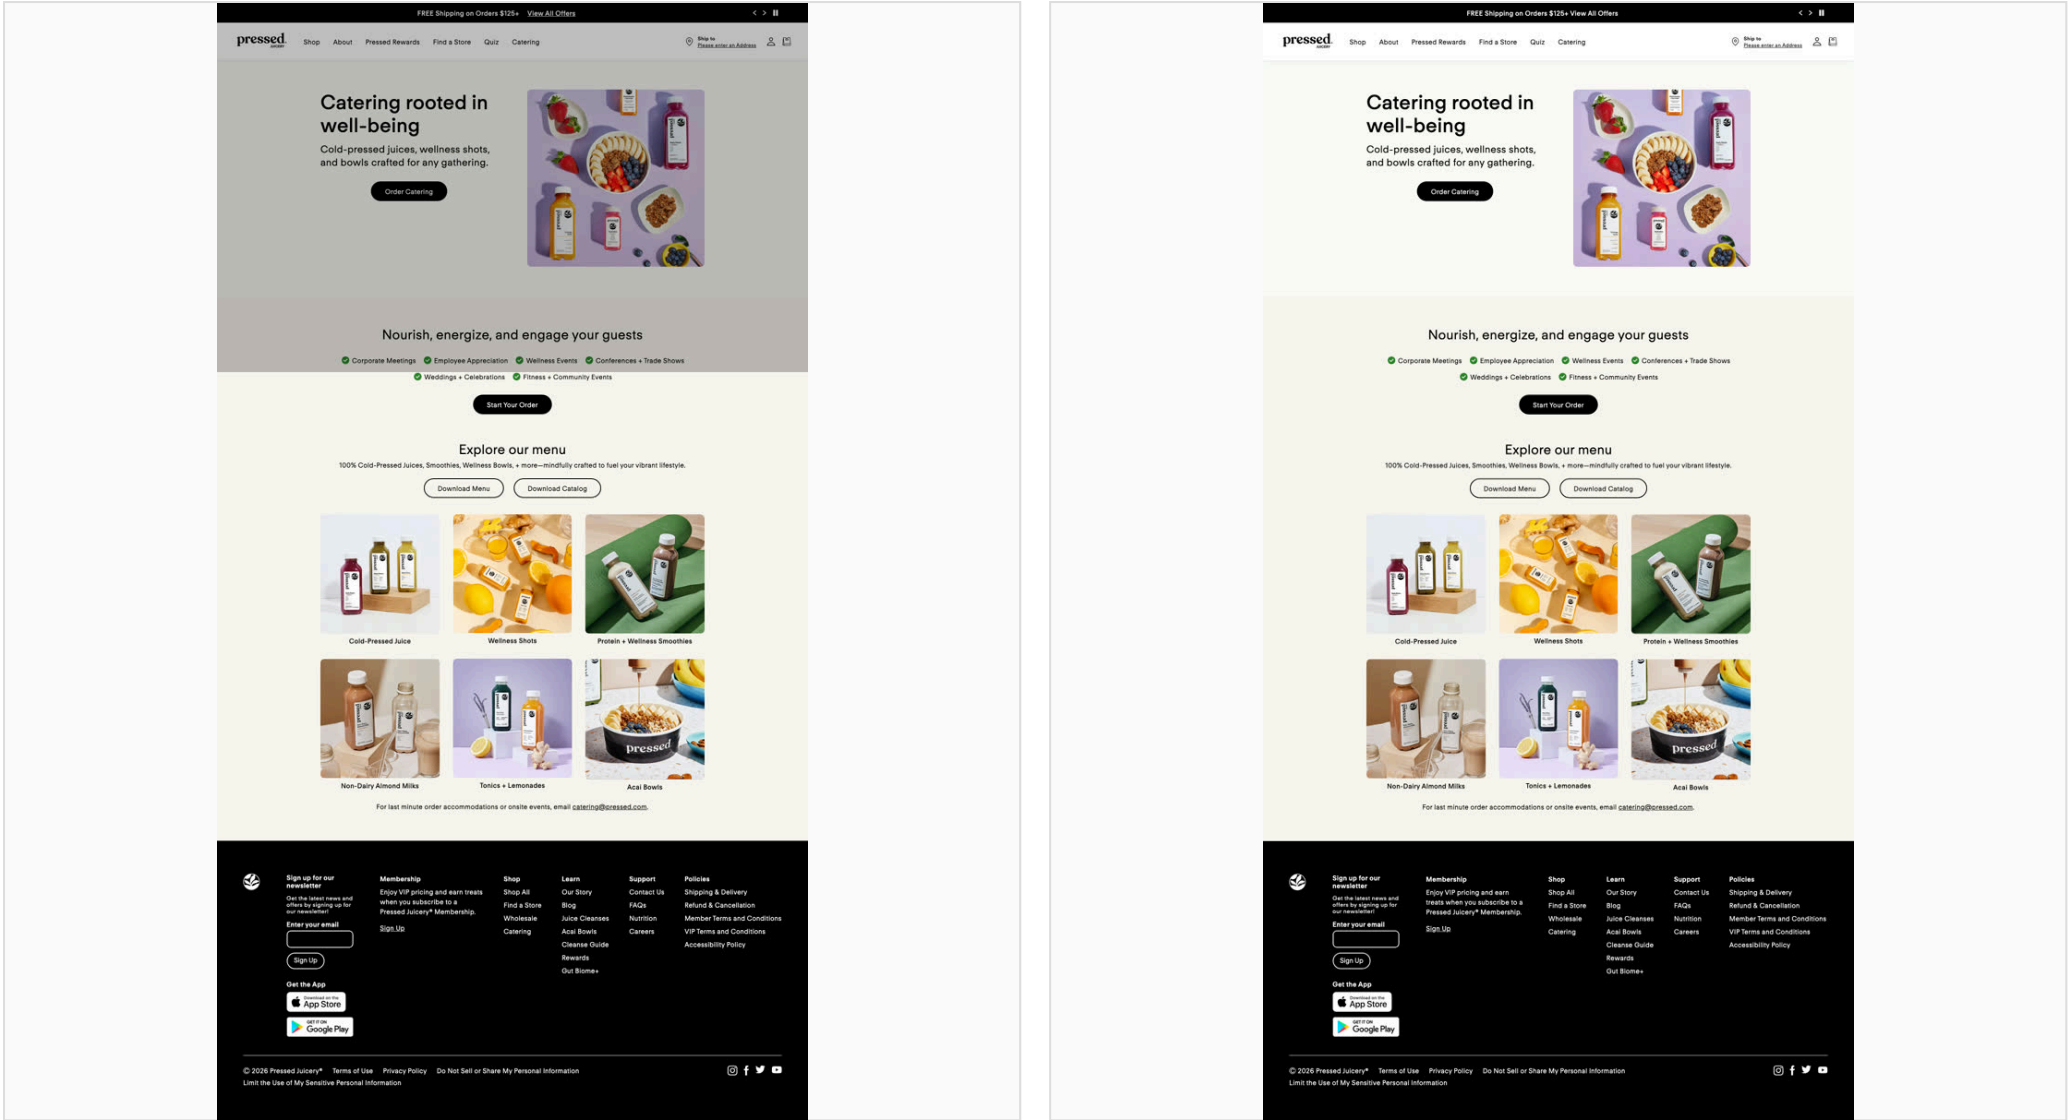

CLONE (STATIC BUILD)

DISCREPANCIES TO FIX

- 1. [low] Quiz body — [KNOWN-GAP] Live embeds a third-party lightbox quiz form with no captured src; the page renders its surrounding chrome only. Page height now matches live exactly (1569px).
- 2. [low] Header wordmark — [FIXED] Restored via the <source> srcset.

DISCREPANCIES TO FIX

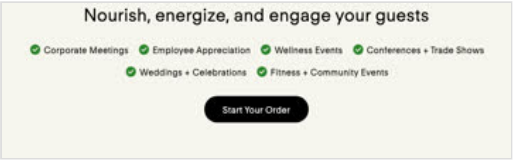

- [low] 'Catering rooted in well-being'** — [FIXED] Restored the space dropped between {'Catering rooted in'} and the .
- [low] 'Start Your Order' CTA** — [FIXED] Was w-48 and wrapped to two lines; set to whitespace-nowrap auto-width — one line, matching live.
- [low] 'email catering@pressed.com'** — [FIXED] Restored the dropped space before the linked address.
- [low] Footer legal casing** — [FIXED] Kept live's Title Case (a mistaken sentence-case edit was reverted).

DISCREPANCIES TO FIX

- 1. [low] VIP Pricing CTAs — [FIXED] Were stacked full-width; changed the container to a wrapping flex row — now two side-by-side pills (x=40/233) matching live (x=40/237).
- 2. [low] Header wordmark — [FIXED] Restored via the <source> srcset.
- 3. [low] Tier-card benefit icons — Minor; both live and clone render the benefit text — check-badge parity not conclusively different in measurement.
